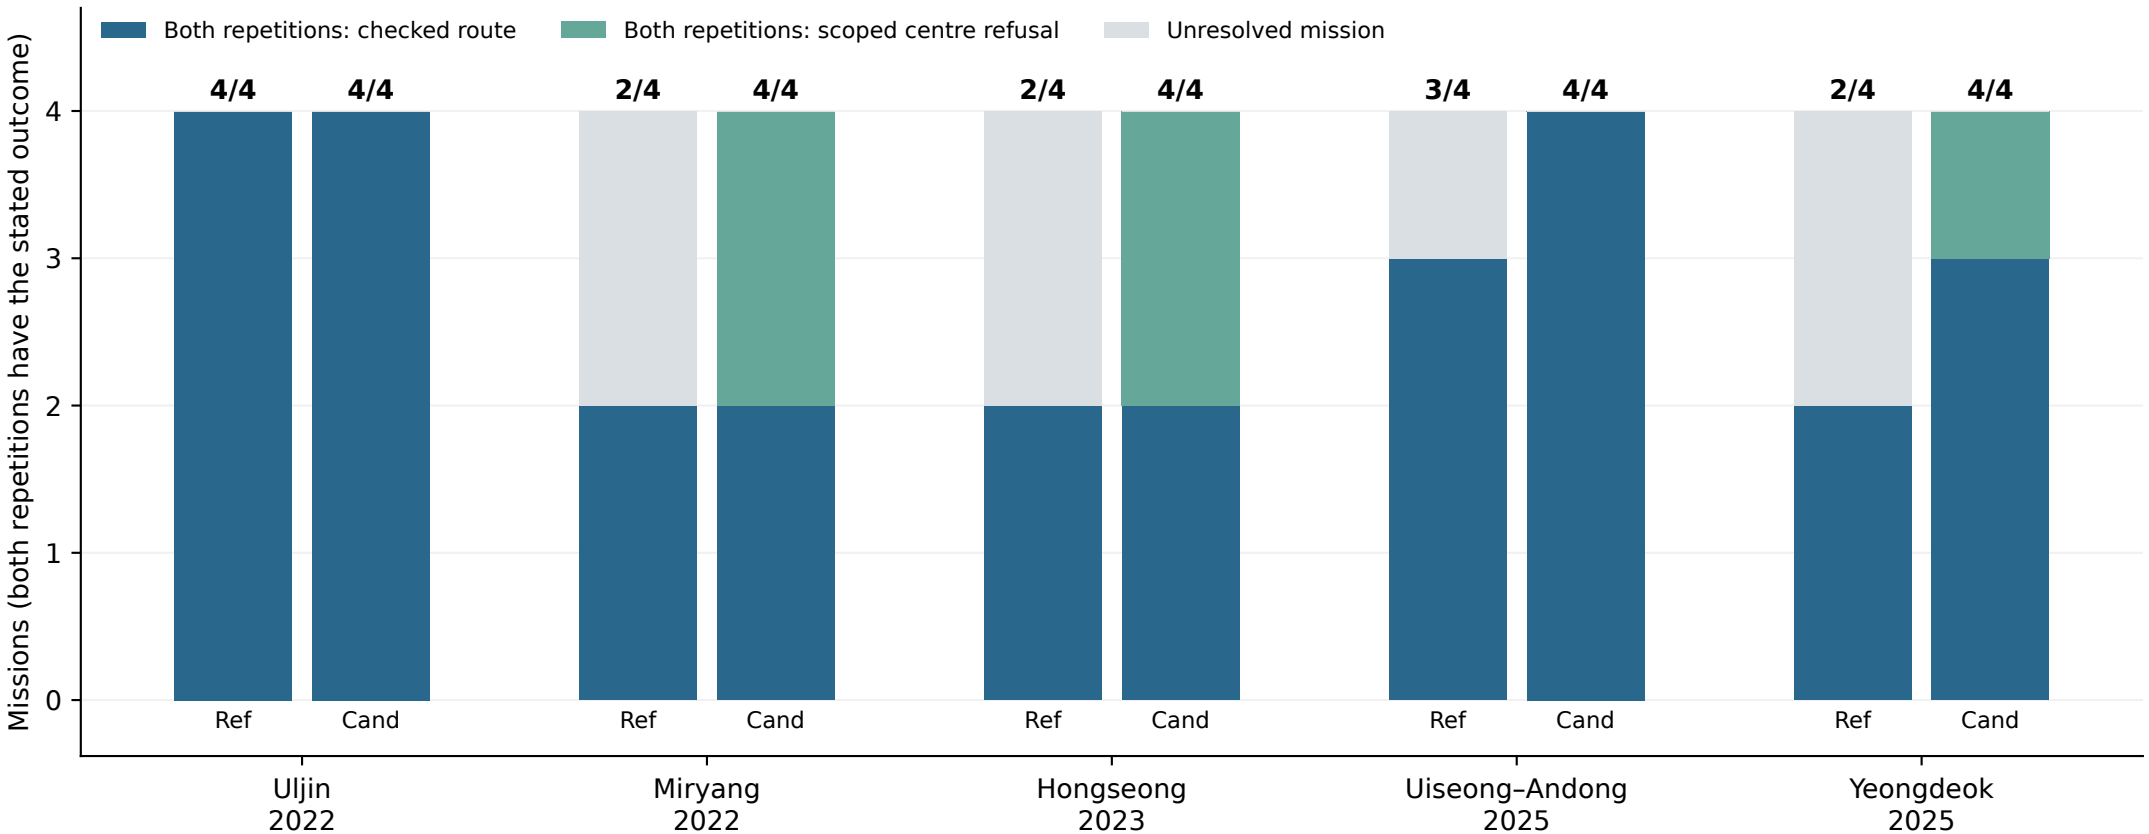
Resolution separates returned routes from scoped refusals

Latest c651 • five regional groups / four parent incidents • four missions per group / arm • two repetitions



Candidate: 20/20 resolved missions = 15 route + 5 scoped refusal; reference: 13/20, all routes.
Independent route optimum/refusal is centre-model scoped. Runtime road certificates are recorded separately; physical safety and independent continuous-road/global proof are not established.
